(54) WATER-RESISTANT PHOTOCATALYSTIC COATING CURABLE AT ORDINARY TEMPERATURE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide the subject coating capable of protecting the surfaces of articles from their physical and chemical deteriorations and capable of preventing corrosion and stain adhesion due to the breeding of organisms.

SOLUTION: This photocatalytic coating comprises a liquid obtained by dispersing photocatalytic titanium dioxide and silicon dioxide in mixed alcohols and an ethanol solution containing an ethyl silicate, a silane coupling agent and methyldiglycol.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
